

iConsult

iConsult is a Dermatology Information System. It allows Aestheticians to take picture of patients and then visually work with the image to decide treatment options and locations. Technosoft has been providing services to iConsult for over two years now. They have an iOS front end and Java/Spring/Hibernate backend. Technosoft is responsible for all software development, quality assurance, deployments, maintenance and help desk support.

Technology & Achievements:

- Native app built on iOS 6 for iPad devices
- Rich web application based on JSF, Spring, Hibernate, and Apache Shiro security framework
- Integration with PayPal and iCal
- Integration with Amazon S3, SES
- Rich image editor with capabilities like drawing, annotations, applying product treatments on images
- Supports offline consultation data including images. Data is sync with server via queue system that makes sure no data or images are lost
