

Company Profile

An introduction to the Technosoft Solutions

An ISO 9001:2008 certified company with 10 years of Healthcare software development and integration experience.

Services

Technosoft provides software solutions to almost any type of problems regarding healthcare but we specialize in HL7, HIPAA and mHealth.

HL7 & Custom Interfaces

We have developed and managed many HL7 interfaces including

- outbound Scheduling SIU (S12-S16, S26)
- Inbound/Outbound ADT (A01-A36)
- Outbound Charges (P03)
- Inbound Orders (O01)
- In/outbound Results (Text, PDF, PS, HTML, JPG, and base64 R01) interfaces.

HIPAA compliance Solutions

Technosoft has been involved with major healthcare software providers to make their solutions HIPAA compliant since early 2000.

- We have senior HIMSS Certified Healthcare Security Professionals in our staff.
- We have intimate knowledge of HIPAA privacy and security regulations and its local implementations/interpretations.
- We have pre-developed many software frameworks that help us quickly deliver HIPAA compliant solution.

mHealth

We provide iPhone, iOS software development services at very affordable prices. We have developed iPhone native and web applications. At the same time we have also developed android applications. Technology is changing at rapid pace and future is all about mobiles and tablets we think we are well ready to face that challenge.

If you have HL7 or HIPAA related question. Let discuss >

Healthcare Projects

We have created numerous applications for hospitals, pharmacies, physicians, patients, and manufacturers enabling exceptional results in healthcare quality, effectiveness, and accessibility. We create custom-made mHealth apps by us for our clients are actively used in diagnosis, treatment, monitoring, and education.

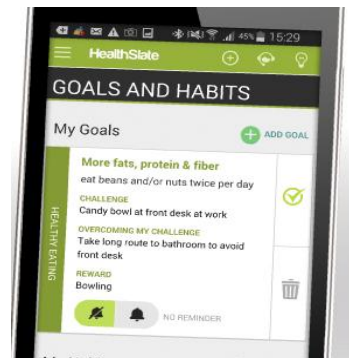

Phyzit TCM

Phyzit TCM is a transition of care management solution. The Phyzit solution allows physicians to virtually visit patients via secure Video conferencing solution. Phyzit is currently an iOS based solution on the client side with a .net based backend hosted on Microsoft Azure.

HealthSlate Patient App

HealthSlate Patient app is a chronic Disease management system completely developed by Technosoft. It's a native iOS and Android client side application with Hibernate, Sprint, Elgg, MySQL backend on Amazon's HIPAA compliant private cloud on AWS and RDS

iConsult

iConsult is a Dermatology Information System. It allows Aestheticians to take picture of patients and then visually work with the image to decide treatment options and locations. Technosoft has been providing services to iConsult for over two years now. They have an iOS front end and Java/Spring/Hibernate backend. Technosoft is responsible for all software development, quality assurance, deployments, maintenance and EMR Care Management Solution help desk support.

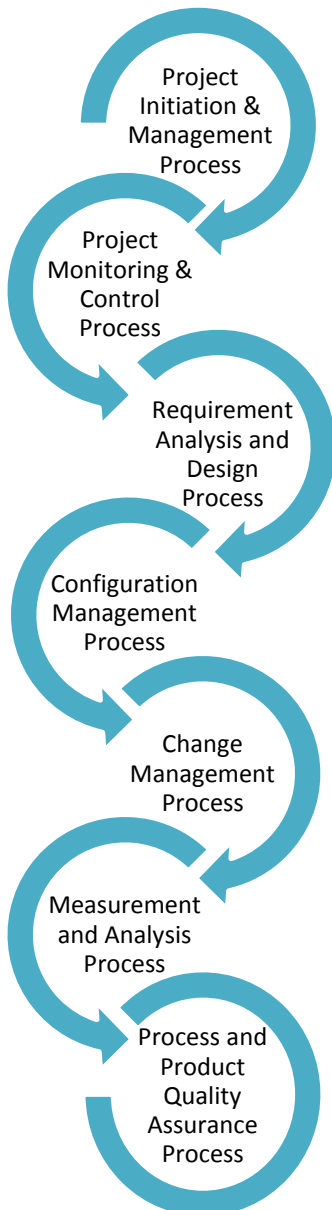

HealthFleet

HealthFleet™ OS, the open platform that's breaking through the barriers of when, where and how. Using this you can integrate, coordinate, and deliver a personalized chronic-care experience — outside your four walls — any way you choose.

Success Repeatable

It is a pride that over 90% of our work comes from our existing customers. Our customers who once start working with us are staying with us. Its result of our Perfect Software Development Process.

Our Clients & what they say about our work:

We have worked with Technosoft for almost five years. They work as a virtual extension of our in-house team. They deliver very high quality work. The staff has a broad range of technical expertise that delivers the right solution for the problem faced. Technosoft is highly recommended.

Dr. Ronald Miller, MD
President & CEO - Chart Links LLC., USA

These guys are fantastic. They are the most professional programmers I have had the pleasure of working with. They were in constant contact with me. They corrected everything I asked for. I recommend them to you highly. It is a pleasure to find this group to work with. We will be doing lots of business in the near future.

Dr. Hamed Amani
CEO - Burn Help

Technosoft began working on the iConsult project when my existing developer had to leave. During the process of interviewing new developers I was very impressed with their experience in healthcare tech development, their client list and quality of work in both iOS and JAVA. What became apparent very quickly is that these guys will WORK HARD for your product. I would definitely recommend them.

Richard
CEO - iConsultAesthetic

[More Testimonials >](#)

For more than 10 years, our commitment to providing reliable healthcare system software solutions has remained constant and stable.

We are endowed with quality certifications and standards, including CMMI ML2, ISO 9001:2008, Sun, and MySQL and as IBM Certified Partner.

We are dedicatedly working for companies developing healthcare solutions for the U.S market.

Many of our clients are well versed in software development and have healthcare solutions deployed at main hospitals. We augment their resources with our HL7 integration, HIPAA privacy & security services.

We're passionate about Healthcare Software Development to improve Patient Care.

If you have any idea, we can help you to take the next level and bring it to action.
